THE PEOPLE HAVE A RIGHT TO VOICE AND COUNTERVOICE

~ No. 3/12 ~

INTRO

*"Your time is limited. Do not waste it living somebody else's life. Do not allow dogmas to constrict you – they are the result of what others were thinking. Do not let the noise of the voices of others choke your inner voice. The most important: Follow your heart and your intuition, they know already what you really want to become. Everything else is secondary."**
Steve Jobs

Father of climate change theory corrects himself

British Biophysicist James Lovelock, meanwhile 92 years old, is regarded as one of the "Founding Fathers" of the ecological movement. Without him we would not have the theory of supposed climate change. He was one of the first to warn about the atmosphere warming dangerously due to introduction of increasing amounts of CO₂. Every media broadcasted or published his statements. In a current interview with MSNBC, he admitted being wrong: "The problem is, we don't know what is happening with the climate. 20 years ago we thought we knew and we published alarmist books - my own included - because everything seemed clear. But nothing of what we had predicted has taken place." Media around the whole world are concealing this.

ADHD – Preschool-aged kids often diagnosed wrongly

sj. Kids put into school at preschool age – ADHD diagnosis often wrong. With headlines like this the press tries to distract us from the fact that it was their own articles which previously praised these diagnoses. A Canadian study with 900,000 kids proves the fact of a close correlation between being put into school early and the so called "hyperactive children". Oskar Jenni, child development specialist at the Zurich children's hospital says: "The children's disturbing behavior is interpreted as spasmodic although for those starting school at such a young age – this can be considered normal". For many years millions of kids have been prescribed the dangerous psychodrug Ritalin on the basis of this fundamental mistake. Regardless of the endless stream of

victims – falsely diagnosed who are coming to the light and in spite of the Canadian research, the pharma-lobbied media continues to sell us "putting kids into school earlier" as a spectacular, supposedly "exploding trend". Jenni warns: "This drug can have effects on children's appetite, sleep and growth." Pumping disturbing (active and lively) kids full of psycho-drugs is a crime with tough consequences. But as long as the profit addicted pharmaceutical concerns continue to make money with patients, doctors and psychiatrists, this tragedy will not stop. Until we the people object to this crime, raise our voices and demand new paths in medicine this will not end.

"More unforgivable than committing an error is to not draw any consequences of it."

Ralf Giordans

The Euro Disaster

According to Max Otto, professor at the University of Graz, Switzerland, who also predicted the financial crisis, the supposed Euro crisis is in reality a bank crisis. All the aid programs neither help Greece nor Europe. The main beneficiaries are above all investment banks and super wealthy – the main investors in ailing European countries and those who gambled with Greek government bonds. Only for them the Greek taxpayers are pressed to pay – under the guise of

saving the Euro. The aid packages from America, which has a still larger problem, are just a distraction and designed to push through France's economic interests. Even Frank Schaeffler the top financial expert of the German liberal party FDP, admitted the aid programs will only lead to a further escalation of debt. They can never solve the problem.

Germany: 10 million abortions since the 60s

is. Abortion is methodically planned, systematic murder of the next generation. The far-reaching consequences, in nearly every level of society, are extremely negative. The drastic consequences of this are obvious and hit every level of society, making a significant and extremely negative difference. In simple figures it's the same as if no baby had been born anymore in Germany since 1996. That's the result of abortions not only being allowed but even financed with public funds. A US Elliot-Institute study shows how the average woman fares after having an abortion:

92, 6% - feelings of guilt
88, 2% - depression
82, 3% - loss of self esteem
55, 8% - suicidal
66, 0% - ending the relationship with partner
40, 6% - resort to drugs
36, 5% - resort to alcohol

Public television, for example the RBB program "Kontraste" from 14.04.2011, doesn't see any problem with abortion. Instead they brutally criminalize those who actively, lovingly draw attention to these dramatic consequences and so save thousands of babies and their mothers from this disaster.

Virus alert! Countervoice web sites seem to be at high risk of virus attacks. Hand-to-Hand Express avoids this danger - information concise and to the point, without using the internet - Advice for all who still consult the links: never access the internet from a PC with sensitive data.

You have important news? Write a short Hand-to-Hand Express article. - Clearly state the major point and name the responsible people! - Sources if possible without internet! - Then send your short article to SuG@infopool.info

Twitter plans on using national filter

me. The online news service Twitter, which currently provides 100 million users with the opportunity to exchange messages, wants to soon make it possible to block messages in certain countries. This means that contributions will be invisible in some countries while the rest of the world can still see them. Twitter hopes to use this filter system to attain easier access to countries with restricted freedom of opinion (e.g. China). But critics say that the criteria for blocking singular contributions are not actually stated and are lastly set by Twitter alone. One thing is for sure: Internet censorship is on its way. The only way to stay non-manipulated is to build Internet-free connections and works.

Lucrative journalism

ef. In the year 1982: "This counts for journalists as critics: Please do not forget the monetary benefits of the press identification, for instance for the purchase of longterm consumption goods. The Volkswagen works gives journalists 15 percent; other car companies give even higher rebates. After all, journalists who are usually so conscious of the public, like to keep their tax privileges secret. Every professional journalist pays no taxes for 250 Marks monthly income (n.b.e.: German currency). If he is a member of the state press conference, it is 5600 Marks annually; the half-thousand journalists in the capital do not pay taxes on 10.200 Marks a year – as members of the

"Only cash is the real deal!" – EU gets rid of cash

bu. By means of the still widely unknown EU-Money Directive, cash is, step by step, supposed to be eliminated also in Germany in order to pave the way to „innovative and safe e-money services“ without cash. For this aim the sum of cash citizens may use in Germany is to be reduced further and further [as from August 2012, n.b.e.], like it is already the case in other countries. One motive has been propagated cleverly and at great expense in Sweden: crime rates would drop without cash and consequently the risk to fall victim of robbery and violence. However without cash almost the entire life

of the citizens becomes transparent: the government and banks know where, when, what for and how much money you've spent. This entirely cashless money circulation offers enormous possibilities to governments and banks for controlling citizens and clients extensively. It also opens the door to unlimited manipulation of virtual money. Who will then protect the people from possible crimes committed by government and banks?

"Population Explosion" – a simple calculation

li. Ralph Epperson refuted, with a simple calculation, the thesis of overpopulation that was drummed into our heads for decades: "Oregon, a rather small state compared to others in the USA, has an area of 95.607 square miles. If a whole world's population, of about 6 billion, would move to Oregon and leave the rest of the planet totally empty, then a family of four would have a piece of

Oregon, about as big as 40 by 43 meters. That is about half the size of a typical lot."* Truth can be so simple! It should be quickly made known worldwide by word of mouth.

Source:
The unseen hand, A. Ralph Epperson, page 230.

*"And further by these wise words be warned: The making of many books has no end, and much study is a weariness of the flesh."
King Solomon 1000 B.C.*

national press conference."* Why don't we all have the same right? Who allowed this? Such tax privileges make journalists more easily manipulated – easily blackmailed. Whoever doesn't write "politically correct" is quickly out of the game and thus out of the special rights. Tax advantages for journalists also always mean tax disadvantages for everyone else. How is it today and how will it be in 30 years?

A computer answers questions

gf. Two years ago, Google's head of administration, Eric Schmidt, stated: "Most people aren't satisfied with Google answering their questions; they also want to be told what to do next. In order to fulfill this wish, innumerable pieces of information about people, things and places are being collected and linked together." This is how the semantic web is created, the search engine that can be asked and can

Facebook:

Friend Finder illegal

lr. The Berlin State Court decided that the option "Friend Finder" in Facebook was against German law because Facebook members were seduced to disclose to Facebook the names and e-mail addresses of friends who are not members in this social network themselves. The court holds the view that Facebook would not sufficiently inform their users that with this option they upload to Facebook all e-mail contacts of their friends, e.g. from Outlook or from the address book of their mobile phones. The consequence could be unwanted invitations to Facebook membership which is considered an offense. The verdict obligates Facebook to inform precisely and in all detail about this context. Every clear-minded person should realize sooner or later that Mark Zuckerberg had complete knowledge of these and some other news before he lured the masses into the Facebook stockmarket trap.
