THE PEOPLE HAVE A RIGHT TO VOICE AND COUNTERVOICE

~ No. 8/13: MONSANTO ~

### INTRO

Now that the US Supreme Court has - in the case of Monsanto vs. a small farmer - definitely backed-up the giant agro-chemical corporation Monsanto, we want to call to memory our 2012 S&G yearbook. With this reference book we can comfortably turn to the glossary, locate the case Monsanto in the following issues - S&G 2012 (in German): 2, 4, 7, 8, 9, 10, 34, 35, 39, 41, 44, 47, 48, V&C 2012 (in English): 7 and 8 - and study it in its shocking entirety. Anyone who does this will easily recognize how threatening to all peoples and how unbelievably criminal this company is which the Supreme Court just covered for. With this "MONSANTO" special issue we have done this small but important job for our distributors. We put together the weightiest articles in a new issue. That is how every reader can work with the S&G yearbook. For nearly every topic one establishes quickly a general overview: open to the glossary, look up under ... M... like "Monsanto" - copy the important articles, put them together, copy the page - finished! In this way we deal with every weighty topic. In order that Rockefeller's Monsanto giant cannot gain absolute control over our food supplies, the people must know what is happening. Win faithful couriers and distribute the V&C everywhere. When supreme courts fail, then it is time that the public rises up above them again. V&C readers repeatedly take the first steps!

Ivo Sasek

### 25 May 2013: The world on the streets against "Monsanto"!

A worldwide protest network has formed against the agro-chemical giant. Demonstrations will also take place in Berlin, Munich, Frankfurt, Krefeld, Duesseldorf, Bern, Zurich and Vienna. More information under: [www.march-against-monsanto.com](http://www.march-against-monsanto.com). For all those who would like to make known the V&C during the demonstration, this issue is available for download at [www.anti-zensur.info](http://www.anti-zensur.info).

### Monsanto infiltrates the USA

ub. Monsanto Chemical Corporation is flooding the world with genetically manipulated seed and seems to have international politics in its grip. The U.S. government is downright infiltrated by Monsanto. It was discovered that U.S. diplomats work for the chemical corporation. Monsanto Corporation is taking part very intensively in the legalization and setting up of guidelines for genetically manipulated organisms (GMO) and has influ-

ence on important key-positions in the U.S. government. For countries defending themselves against the spread of GMO, the French U.S.-ambassador even called for "retaliatory measures" in a mail published in WikiLeaks. Is it surprising that with such influence on politics, the larger portion of U.S.A. food-staples is already genetically altered? There is little doubt that in Europe the situation is similar.

### Goliath strikes again! - Where is David hiding?

is. The Supreme Court of the USA supported the agri-chemical group Monsanto in a patent quarrel. Monsanto accused a small farmer, who had bought genetically altered soy, which he bred and sowed out. The judges decided, that the farmer had infringed Monsanto's patent. He would have to buy new seed for every new sowing, from the manufacturer. Once again the public is left in the dark about the fact that small farmers cannot defend themselves against the pollination coming from the genetically manipulated fields, which are patented for that reason. The fields of the small farmers are simply being mutilated by Monsanto

products. Then samples bring proof that this small farmer infringed the patent. If Monsanto and other criminals in agriculture manage to get all the seed of the whole world community into their hands, they are able to cause famines when and wherever they please. They can let the prices rise into heaven and by doing that leave us in hell. Whoever wants this: just stay inactive now. Whoever does not want this, take the V&C and distribute it with all your energy.

### Monsanto under false flags

The name Monsanto stands for 250,000 Indian farmers who have committed suicide because of destructive seed which ruined their entire existence. Also in the USA more and more farmers are warning against using the products of this company. While one farmer after the other slides into disaster because of Monsanto, this company grows like a huge cancerous tumor over the earth. In order to veil its bad reputation, the corporation sells its vegetable seeds to hobby farmers under the camouflage of the names of other companies which it formerly bought up. Like this Monsanto spreads

genetically altered cucumber, tomato and salad seeds under the name "De Ruiter Seeds". The company name "Semenis" is misused in this way as well. Worldwide Monsanto maintains a tight network of exclusive sales companies which are used to spread the hazardous stuff to the customers under other names. The Brand name "Kiepenkerl" is another such company. It can be traced back to "De Ruiter Seeds" which can be traced back to Monsanto. According to Monsanto, this seed is not genetically altered. However everything which benefits this corporation is destructive for humanity and above and beyond this destructive for all of nature and the planet.

**Virus alert!** Countervoice web sites seem to be at high risk of virus attacks. Hand-to-Hand Express avoids this danger - information concise and to the point, without using the internet - Advice for all who still consult the links: never access the internet from a PC with sensitive data.

**You have important news?** Write a short Hand-to-Hand Express article. - Clearly state the major point and name the responsible people! - Sources if possible without internet! - Then send your short article to [SuG@infopool.info](mailto:SuG@infopool.info)

**Monsanto's suicide gene**

**freho.** Secretly Rockefeller's Monsanto Corporation produced, introduced and spread seed with a suicide gene, better known as the terminator-gene. This designer-grain seed is developed with great effort in the laboratory and genetically altered, so that the following generation is infertile. All of this is done with the single intention of keeping farmers dependent on Monsanto for better or rather for worse, because the farmer cannot use anything at all from that harvest to sow the

following year. This is not yet enough: combined with buying Monsanto's seed the farmers also have long-time, disadvantageous contracts, because the terms are so that only Monsanto products may be used. How long will it take until Monsanto's insatiable, money-hungry octopus arms have grasped and sucked the life-blood out of even the very last consumers?

**They fall over and are dead**

**hf.** While supposedly the genetically modified soy plants should manage with much less chemical sprays, the same chemical corporation is producing unthinkable quantities of chemical sprays (e.g. Roundup). In Paraguay, for instance, every year about 20 million liters of fungicides, herbicides and pesticides are sprayed on fields and cultures. Hundreds of women, children and men

are hit by poison effects, get skin rashes and inexplicable bumps on the skin, deformities, diarrhea, vomiting, paralysis and blindness. Many of them just fall over and are dead. When in Paraguay the people fall over dead – then we stand up and call this injustice by its name: MONSANTO!

**German government ignores the risks of Glyphosate**

Once again the German government expressed its lobby-friendly attitude towards Monsanto and Co. On Monday (February 12<sup>th</sup>, 2012) the Food Committee held counsel about stopping the use of the pesticide Glyphosate. The CDU/ CSU (Christian Democratic Union) and FDP (Liberal Democratic Party) continue ignoring scientific research about the danger, Roundup and other pesticides containing Glyphosate present for environment and health. They even go further to claim that supplying affordable and healthy food would not be possible without these herbicides.

Although a study by the German Nature Conservation Federation e.V., proves that Glyphosate not only damages the environment, but also leads to an increase of miscarriages, deformities and cancer, striking humans. [Isn't it the same with animals? – comment by the editor]

**Patents on seed**

“Since large manufacturers have been allowed owners' rights and patents on seed, 250,000 Indian cotton farmers have killed themselves, after buying genetically modified seed – a Monsanto patent – and becoming hopelessly caught in debts. Seed is life. If we lose control over it, we lose the liberty and indepen-

dence of our food supply.” (Vandana Shiva, Indian physicist)

**Monsanto-critical reporters fired**

**ho.** Monsanto sells “Posilac”, a hormone to raise the milk performance of cows. This is suspected of requiring the use of antibiotics. The milk quality suffers from this drug: the combination of the fats and proteins changes, the vitamin content drops. Moreover, the residues of the additives can damage human health, too. When the two Fox journalists Steve Wilson and Jane Akre wanted to report about this in

1996, their employer “Fox13” (television station) yielded to the strong pressure of Monsanto Corporation. He did not disclose to the public the report, at first critical towards Monsanto, later changed 83 times under the control of Monsanto's lawyers, and finally fired the two reporters. What does this all look like in other countries?

<http://www.sackstark.info/?p=12177&cpage=1>

**Victor's Corner:**

**Hungary throws out Monsanto...**

Hungary's prime minister Viktor Orbán expelled Rockefeller's chemical, food- and seed giant Monsanto from the country because, unlike in most European countries, genetically modified seed is forbidden in Hungary. According to the vice minister for rural development (Lajos Bogнар), even 400 hectares of land were plowed up, to destroy the genetically modified seed. Orbán, who holds a 2/3 majority in parliament, can count on further support, dealing with Monsanto. In the meantime, the USA however, are starting sale-

wars in military style against nations which stand up to Monsanto and GMO plants. So it is not surprising that many US diplomats work directly for Monsanto, to convince other nations of the benefits of GMO technology. So all respect to every government who still cares for the needs of its country and who, like Victor Orbán, is ready to pay a very high price to make a steadfast countervoice.
