THE PEOPLE HAVE A RIGHT TO VOICE AND COUNTERVOICE

~ No. 12/13 ~

### INTRO

*A middle-aged woman is standing in front of me at the doctor's office and asks the two receptionists behind the counter if the influenza serum has arrived yet. One says „no”, the other „yes”. Then the negative one says to the other (citation): „You don't want to kill her. The serum is only for the over 61 year olds.” Just a slip of the tongue?*

*The doctor's receptionist may have her explanation for what was meant. However, I thought of the agent intensifiers in these serums and their deadly consequences for the elderly and others.*

*After I witnessed several cases of death and disability in my environment that occurred directly after vaccinations, I wonder if perhaps the two doctor's receptionists unintentionally spoke out a staggering truth?*

*The editor (dsch.)*

### Deadly vaccination:

*Personal testimony, see also the AGB-brochure "Vaccination – before and afterwards" and the documentary "Pressured to Vaccinate" by Panorama-Film*

**„There are several reasons to leave everything as it is and only a single one to change something: You simply can't bear it anymore!”**

*Hans Curt Flemming*

### WHO withholds research findings

**wm.** A Danish research team examined the long-term effects of vaccinations on children in the west-African country of Guinea-Bissau. Between 1990 and 1996, Peter Aaby, Henrik Jensen (epidemiologist) and the physician Ines Kristensen included more than 15,000 women and their newborn children into their study and regularly checked on them. They came to alarming conclusions: Of the children who had received the classic quadruple vaccination against diphtheria,

tetanus, pertussis and polio, almost twice as many had died before the next control visit compared to those who had not been vaccinated. Although these research-findings have been known for years and the WHO (World Health Organization) is aware of them, no changes have been made to

those “deadly” injection practices! What else has to happen before we finally reach that point?

**“Your doctor will lose all his wealth when you're dead – or of stable health. To stay afloat he will be keen to keep you somewhere in between.”**

*Eugen Roth*

### Planned reduction of the world population

**mv.** Sir David Attenborough, a leading figure of the British Empire, said in a radio interview on January 21<sup>st</sup> 2013: “We humans are a plague to the world. In the next 50 years or so this earth will take revenge. This is not only about climate change; there is simply a lack of space and land where food for

this enormous growing horde can be grown. Either we limit the population increase or nature will do that for us, like it's already doing at this very moment. David Attenborough is spot on – it seems the “revenge of nature” is already being “staged”. To mention a few examples: Earthquake

caused by earthquake weapons (S&G 2/12, 16/12), diseases caused by vaccinations (S&G 52/12) chemtrail-contaminated fields and meadows (S&G 42/12) and many more...

### Small gardens could feed the world

**ff.** With an estimated total of 35 million family-owned backyard gardens, or “datschas” as they are called, Russia is demonstrating how a whole country can easily be fed. In 1999, about 71% of the population produced from these “datschas” approx. half of the milk consumed in the whole country, 60% of meat, 77% of vegetables, 87% of fruit and 92% of potatoes – all ecologically and sustainably grown. From an overall perspective, Russian families grow al-

most all the food they need themselves. The Russian government supports this family farming culture by law with every Russian citizen having the right to obtain a free piece of private and tax-free gardening land between approx. 1 and 3 acres. If we consider that the grass surface in the US is twice as big as the gardens in Russia it becomes obvious that we neither need genetically modified seeds nor an industrialized agriculture to supply enough food

for everyone! Be aware that the growing season in Russia is only half as long as in the US. Isn't the “datscha” a model worthy to be adopted by all countries?

**Virus alert!** Countervoice web sites seem to be at high risk of virus attacks. Hand-to-Hand Express avoids this danger - information concise and to the point, without using the internet - Advice for all who still consult the links: never access the internet from a PC with sensitive data.

**You have important news?** Write a short Hand-to-Hand Express article. – Clearly state the major point and name the responsible people! – Sources if possible without internet! – Then send your short article to **SuG@infopool.info**

**Egypt:  
Organs are ripped  
out of orphans' bodies**

*ff.* I lived in Cairo for two years and there were regular rumors among the people about orphans disappearing without a trace. Many are victims of the organ-trade! Bereft of their organs, literally exploited, they are often found again with the obvious scars on their bodies. But this dirty business with organs is not just limited to the capital. Increasingly on the Sinai, there are growing numbers of refugees from black-African countries among the victims. Even though this is known to many Egyptians, journalists who try to report about it are muzzled. Who is behind all this? Who is in control of the organ trade?

**The Portuguese  
child abuser affair**

*mab.* "The consternation about the child abuser affair in Belgium overshadows the incident in Portugal at that time: In November 2002, there was revealed that over the years hundreds of boys and girls were sexually abused in state-owned children's homes. The child abusers sexually abused especially deaf mutes and orphans. Here too, the abusers were not looked for in circles of criminals and psychopaths but

**Organ trade as compensation for the Holocaust?**

Israel plays a special role in the international organ trade: In no other country are there fewer organs donated by the population, but at the same time so many requested. For Nancy Scheper-Hughes, professor for medical anthropology at the University of Berkeley in California and founder of the organization "Organ Watch", Israel is the spearhead of the worldwide organ trade. "Its tentacles reach across the whole world." Israeli organ dealers are supposed to be the best organized in the world – with agents, banking accounts, recruiters, translators and travel agencies which get the Visa. The scientist investigated the motives of Israeli organ dealers. "On the one hand it's greed," she says; the other mo-

– tive may seem a little embarrassing: "Revenge, compensation – reparation for the Holocaust." She characterizes a talk she had with an Israeli dealer, who told her that it is somehow a question of "an eye for an eye, a tooth for a tooth. We are chasing every single kidney, liver and heart that we can get. The world owes them to us." Israeli doctors have commented in the same way, too.

among people with highest reputation: ambassadors, popular TV stars and ministers. The investigators even put a trace on Eduardo Ferro Rodrigues' telephone, the party leader of the socialists at that time." This report was in the Berlin "Morgenpost" on the 06/18/2003. It's difficult to write it down, but for over 30 years children of the state welfare institution Casa Pia in Portugal were abused, tormented and among other "chartered" for sprees and perverted film shootings. The child abuser affairs of the last decades loom one and the same picture everywhere that the highest echelons of the government right up to the royal houses have taken part in these crimes on the weakest of our society. Added to that, the voice of one of the Casa

Pia victims, that put the dilemma in a nutshell: "When the suspects got known, the victims became the bad guys," remembers Namora. "But it can't be that children got abused for years and things got done to them, you can't even imagine, and then it's said the accused are respected personalities; don't bother them."

Now the time has come that these incredibly terrible things along with the respected personalities are dragged to daylight.

**Victory Corner:**

**Bravo!!!**

**Organ transplant  
rejected –  
daughter alive!**

*mol.* A Polish father whose 19-year old daughter was in a coma with major injuries and brain damage after a traffic accident, had been urged by the doctors to approve donation of the daughters organs. In his misery, he contacted a professor for rehabilitation who took the young woman into his clinic. Prof. Dr. Jan Talar developed a therapy with which the 19-year old has been fully healed and has since married. The therapy is very simple:

Through permanent stimulation (head/ face massages, playing of music, speaking to the patients...) the coma-patient is stimulated for several weeks. Prof. Talar has already brought many "hopeless cases" back to life in this way. However, he had to leave the clinic he was working for at that time because his successful therapies damaged the transplant business.
