THE PEOPLE HAVE A RIGHT TO VOICE AND COUNTERVOICE

~ No. 15/13 ~

INTRO

"Well done!" Several people in this V&C are pioneering for all the enlightenment services. In particular, as the first article proves, every wrong statement can be refuted by an open inspection. You can reveal life threatening insider information as shown in the concluding article. Certainly it is fantastic when these deviants betray themselves by speaking and doing things without thinking. As mentioned in the Swisscom article below, when mobile network operators boast that their new patent is "less cancer-causing" they are openly admitting their guilt! and so on ... And from that point there is no turning back - neither for them nor for public prosecutors. With that, the cat is let out of the bag! It's time for class actions and claims for damages - before the billions of dollars worth of damage are "socialized", i.e. before the costs are passed on to the victims.

Ivo Sasek

Congratulations!

Baden-Württemberg's Department of the Interior convicted of false testimony!

uw. After a new cellular tower was brought into service for administrative communication in the town of Herrischried, more and more people complained of headaches, sleeping troubles, exhaustion, nose-bleed, depression and irritability. The impact on the children, whose school is in the neighborhood of the radio transmitter, was particularly severe. After a survey in the town on this topic the majority repeatedly turned to the authority in charge of the transmitter, with letters and telephone calls, and asked for a statement. Baden-Württemberg's Department of the Interior declared in a letter to Christof Berger, the mayor of Herrischried, on the 8th of January 2013: "... no radiation could be measured at the Ice Rink or on Lindenweg No. 2". TETRA-transmitters usually have a range of up to 30 kilometres. The fact that the places referred to are just 2 kilometres away was the reason for the Department of the

Interior's 8th of January statement being checked in the presence of the local press. The result was clear: On the 14th Feb 2013, signals from the new TETRA-digital-communications tower were the most intense ones in the whole town.... EXPOSED !

Swisscom contradicts itself

mh. Fortunately, patents have to be made accessible to the public. In the patent Nr. WO 2004/075583 A1 from 2004 which belongs to Swisscom, the following came to light: An internal study is quoted which proves the pathogenic* effect of high frequency radiation. In particular it refers to the danger of DNA-strand-break as well as an abnormal cancer risk. Obviously, the publishing of these con-

troversial outcomes have not been agreed on within Swisscom because the Public Relations Department of Swisscom disagreed with their answers on every statement that has been made. Still it is clear that mobile service providers know exactly how dangerous their products are. Out of greed for profit, they accept the loss of health of the entire population, as long as they can hide behind threshold values which they themselves dictate to the politicians. In the long run this can only backfire on them. But until then the profits are being reaped and the last liability will be considered as a social problem (V&C 13/13). Take part as well in exposing this fraud more and more thoroughly before it is too late!

*pathogenic = causing illness

Sickness from mobile phone radiation

kw. The rapid expansion of new and more powerful mobile phone networks is due to increasing pressure from politicians and mobile network companies. Clear and very worrying scientific evidence is being ignored in an irresponsible way. The dangers of mobile technology are deliberately concealed by the mainstream media, so

there is a widespread lack of awareness about it. The result of this disinformation, is that many people do not know that their health complaints are caused by this technology. With regard to the dramatic increase of affected people, it is high time to inform people about the following alarming facts:

1. The following sicknesses often emerge due to mobile radiation: insomnia, depression, headache, tinnitus, concentration disturbance, learning disabilities in children, higher blood pressure, arrhythmia, tiredness, cancer...
2. The blood-brain barrier is opened! Toxins reach the brain! This is probably the main reason for the dramatic increase in

Alzheimer's, dementia and Parkinsons!
3. Our blood or rather the red blood vessels clump together! Our fitness declines and the risk of stroke rises dramatically!
4. Even mobile operators admit there is clear proof of damage to the genetic material of human blood cells and that there is an increased risk of cancer!

continuation page 2

Virus alert! Countervoice web sites seem to be at high risk of virus attacks. Hand-to-Hand Express avoids this danger - information concise and to the point, without using the internet - Advice for all who still consult the links: never access the internet from a PC with sensitive data.

You have important news? Write a short Hand-to-Hand Express article. - Clearly state the major point and name the responsible people! - Sources if possible without internet! - Then send your short article to SuG@infopool.info

continuation from page 1

5. Long-term studies show clearly that near the transmitters the risk of cancer rises to an alarming level! Even the WHO after "evaluating almost all available scientific evidence" rates mobile phone radiation as "potentially carcinogenic" and puts the danger on the same level with chloroform and the pesticide DDT!

6. The following diseases have increased among the young since 2000: disorder of the central nervous system + 85%, neurologic disorders + 58%, blood disorders and disruption of the immune system + 82%! The Russian Commission for Radiological Protection traces this alarming increase "with high probability" back to the radiation from mobile transmitters and the use of mobile phones!

7. According the Max-Planck-Institute, punctual temperatures of up to 100 degrees Celsius are generated in the brain during a mobile phone call. The brain waves are significantly modified!

Water – a human right or a right to a multi-billion dollar business?

ijp. Some years ago, water was privatized in parts of Portugal. The result was a price increase of 400 % for water. Now in Germany, some of the water supply is to be sold to giant corporations. At the very top of the list is Nestlé. Regarding this water privatization, Peter Brabeck-Letmathe, Chairman of the Supervisory Board, said: "I think it is an extreme view to declare water as a public right. I personally believe that it is better to give a value to food, so that everyone knows it costs something."

Excuse me? It is 'extreme' to argue that water is a public right? Is Mr. Brabeck-Letmathe Lord and creator of the water springs? Water is the basis of life and free access to it is a basic human right. Whoever turns it into a profitable business commits a crime against humanity. Let's stop this nonsense now and let it go no further!

Media keep silent about worldwide persecution of Christians

mig. According to a recent report about the situation of persecuted Christians finds its way into the public media. It should be clear to everyone that the media definitely know about it. But it is still not understood by most people why the media persist in remaining silent. Investigation pays off!

This technology is irresponsible and violates the Basic Right to Physical Integrity enshrined in the Declaration of Human Rights! Civil protests in Spain have led to the decommissioning of approx 2000 mobile-network transmitters because, amongst other things, 13 cases of leukemia were reported within a short timeframe in a school in Valladolid!

Victory Corner:

Bravo, Father Don Luigi!
 We honour Father Don Luigi and Franco Adessa for their courage and their sincerity.

Pope Benedikt's Abdication was not unexpected

In the 452nd issue of Father Don Luigi's magazine, "Chiesa viva", an open letter from Franco Adessa to the Pope was made public, which was meant to save the Pope from his early "termination". In his extensive and evidential script F. Adessa revealed several satanic symbols in the new "Catholic Church" of San Giovanni Rotondo. He made it clear: It was a distinctive Satan's Temple – and to make matters worse, consecrated to the Holy Padre Pio. A Catholic Church which has been revealed as a Satanic Temple, where Freemasonry takes place and the worship of their "God" Lucifer is practiced, could not leave the Pope in indifference! - of that Father Adessa was convinced. But weeks passed by in grim silence. Why that? Adessa confronted Pope Benedikt himself with this question in 2012. In his open letter he closed with these shocking lines: Quote: "The only answer we received of you, Holiness, was sustained, perpetual and inexplicable silence! Holiness (...), we came to the conclusion, – to our horror – to suspect the only plausible reason for your incomprehensible silence towards the devastating accusations of "Chiesa viva" (...) namely, that from this moment on we are in that period, where the cult of Lucifer, which has been secretly practiced for a long time at the head of the Vatican, is meant to be spread out and be imposed on the common cult-centers (meaning the parish churches etc.)!! Unquote.

Source of supply:
 „Chiesa viva“ (in italian), Franco Adessa: Eine „neue Kirche“ für den heiligen Pater Pio – ein freimaurerTempel? –, Verlag Anton A. Schmid
www.chiesaviva.com/satanischertempel%20padrepio.pdf

Closing Point •

Is Adessa's final statement correct, that the head of the Vatican has been secretly practicing the "cult of Lucifer", the satanic cult, for a long time? That means that earlier Roman Catholic buildings must actually feature irrefutable satanic signs and symbols. So the hunt could actually start then. Right or wrong? One truth can be irrevocably stated as of now: How F. Adessa predicted Benedikt's abdication in his open letter to the pope in July/August 2012... and the very same is suddenly out of the game. For more detail's see the above sources. Open your eyes for everything coming now!
