~ No. 21/13 ~

INTRO

If someone was to blow their car horn all night, they would be faced with being charged by the police for being a public nuisance. If they did it again, further charges would be added. If they continued to do it regularly and deliberately, they could expect time in jail. However, if mobile phone companies persistently rob millions of people of their precious sleep through exposure to radiation, they go unpunished. If some madman with a pistol ran around and harmed a few people, he would be regarded as a homicidal maniac worldwide!

However.., the mobile phone network operators, as evidenced by the following papers, seriously harm the health of a lot of people and are responsible for innumerable cancer related deaths but remain mysteriously untroubled.

This special edition of the V&C calls the prosecutors to their duty, since it is an ongoing crime against humanity. Whoever remains silent is complicit with the telecommunication companys.

The editor (kw.)

“The animated public discussion about atomic energy will prove to be a gentle breeze compared to what the mobile network will bestow upon us.”

*Minister of the postal service
Wolfgang Boetsch (1994)*

Made ill by mobile telephone system

wk. The growth of new mobile phone networks with constantly increasing transmitting power is hurried along full speed by politicians and mobile phone operators. Clear scientific knowledge is ignored in an irresponsible way. Because the risk of this technology is consciously kept secret by the mainstream media, a gross ignorance regarding it dominates the population. Due to this disinformation most people have no idea that their health problems are caused by this technology. Because the numbers of affected are dramatically increasing, the people have to be informed urgently about the following facts:

1st. Recurring health problems caused include: sleep disturbances, headaches, tinnitus, concentration disorders, elevated blood pressure, fatigue, cancer ...

2nd. The blood-brain barrier gets opened! Toxins reach the brain! This could be the chief cause for

the dramatic increase of diseases like Alzheimer's, Dementia and Parkinson's!

3rd. Our red blood cells agglutinate! Our capability decreases and the risk of stroke increases enormously!

4th. The mobile phone operators concede that an impairment of the genetic substance of human blood cells is clearly proven and there is an increased risk of cancer!

5th. The risk of cancer increases drastically near the transmitter! Even the WHO “after evaluating nearly all available scientific evidence” grades the radiation from mobile telephone systems as “possibly carcinogenic” and put them on a risk level with chloroform and the plant toxin DDT!

6th. The following diseases among the young increased from the year 2000: disorders of the central nervous system +85%, neurological disorders +58%,

blood diseases and disorders of the immune system +82%!

The Russian Commission on Radiological Protection ascribes this alarming increase “with high probability” to the radiation from mobile phone antennas respectively to the use of mobile phones!

7th. During a mobile phone call, a spotty temperature up to 100°C emerges in the brain (Max-Planck-Institute).

This technology is irresponsible and defies the guaranteed fundamental right of physical integrity!

In Spain, mass protests led to the decommissioning of about 2,000 mobile phone systems, because in the school of Valladolid for example, thirteen cases of leukaemia occurred in a short term.

The “threshold” lie collapses

About 20 years ago the private (!) association ICN-IRP, which is run by mobile telecommunication supporters, defined the “threshold” for radiation exposure by mobile telecommunication. The WHO as well as the German government have adopted this threshold (10.000.000µW/m²) and made it the law. The legal threshold defines the radiation intensity which heats up a (deceased!) adult body by 1°C in 30 minutes. It therefore only protects against the effects of heat. The existence of danger through biological effects of electromagnetic radiation is completely denied

and fiercely contested! Dr. med. Joachim Mutter writes about this: “It’s like defining the danger of smoking just by the warming up of the lung during 30 minutes of smoking.” If someone would measure radioactive radiation with a thermometer instead of a Geiger counter and declare radioactivity as harmless based on this temperature measurement, they would be declared insane. With the protection against mobile radiation we are told this is science! Therefore the threshold doesn’t protect anyone. It’s a malicious deception of the public! That’s why no insurance company is

willing to insure mobile communication companies because the collapse of this THRESHOLD lie is inevitable!

“No standardization office has declared thresholds with the intention of protecting citizens against long-term health effects like potential cancer risk.”

WHO on the subject of electrosmog regulations (Oct 1999)

Virus alert! Countervoice web sites seem to be at high risk of virus attacks. Hand-to-Hand Express avoids this danger - information concise and to the point, without using the internet - Advice for all who still consult the links: never access the internet from a PC with sensitive data.

You have important news? Write a short Hand-to-Hand Express article. – Clearly state the major point and name the responsible people! – Sources if possible without internet! – Then send your short article to SuG@infopool.info

Open letter

Swisscom AG
Mr. Lehmann
Walzenhausen, Feb. 27th 2013

Dear Mr. Lehmann!

Now that our talks and negotiations have come to an end I hereby summarize the result from my view: Swisscom installs towers which, like radiation weapons, cause extreme harm to animals and humans (like in my case which I explained to you). Swisscom knows about many other people suffering like me. Despite receiving a constant flow of complaints about the physical and psychological harm they are causing, Swisscom has ignored all requests to acknowledge responsibility. Whoever wants to escape the effects of your radiation weapon must do so at their own expense. Swisscom doesn't want to have anything to do with this and categorically denies any admission of liability. Swisscom is calmly speculating on being able to pass on potential damage claims worth billions of Euros to the tax-paying public later. "This would then be a pure socio-political problem."

Conclusion: Because Swisscom is protected by legislation it continues to disregard any allegation ranging from mild to severe physical damage. In league with ruthless legislators you can uphold your injustice – but not before the eternal justice of God. In the end I remind you of the law of karma from which no one of us will escape. You can harm me and countless others and cold-bloodedly leave us standing in the rain without a cent of compensation. But divine justice will surely bring all those responsible at Swisscom to account for this!

With kind regards,
Ivo Sasek

Mobile telephones nip life in the bud

kl. There are people who still doubt the negative health effects of mobile phone radiation. A simple experiment by Danish schoolgirls should convince even the last skeptics that this technology is in direct opposition to a healthy life: These girls placed carrier trays with seeds of pepper cress in a radiation-free room and a room with two WLAN-routers. Then the girls documented the growth of the pepper cress for the following 12 days. The irradiated cress seeds showed absolutely no germination and no growth, in comparison to the non radiated ones.

The significant difference was unmistakable. The young scientists won first prize in a youth scientific competition for their experiment.

The time has come where the lies of the mobile phone lobby are being denounced through the simplest of experiments and are collapsing like a sandcastle. (see also the documentary "Mobilfunk – die verschwiegene Gefahr")

Do our phone calls kill the bees?

sb. In the film "More than honey" as well as in the mainstream media, the following one-sided opinion was published: bee colonies were perishing due to the Varroa mite and pesticide pollution. University lecturer Dr. Ferdinand Ruzicka from the medical university of Vienna, an experienced beekeeper and profound investigator of bee mortality is bringing up quite another subject: High frequency electromagnetic fields, caused

by mobile phone aeriels, disrupt the highly sensitive sensory organs of the bees and antagonize them against each other without any reason, so that they kill each other. The last survivors even attack their queen bee and kill her. Dr. Ruzicka:... "The mobile phone boom is killing the bees!"

Mobile communications – a real epidemic threat

dg. In 1997 a mobile telephone tower was erected near a farm in Öttingen, Bavaria. By 1998 the local swallows and migrating birds were staying away. The following damages occurred amongst the local dairy herd by November of 2010: Disastrous hemorrhaging of the cows; 25 cows died of immunodeficiency. There were all in all 75 stillbirths with the damage being about 70,000 Euros. No causes were found by the official veterinarian. Those concerned had no success when they contacted the Bavarian envi-

ronment department. The scientists Prof. Löscher, Prof. Klee and Dr. Wenzel all gave the following warning: "We are dealing with a dangerous event, there is a definite connection between mobile phone radiation and the condition of the cattle."

It is just a matter of time before the same epidemic breaks out among us humans: Harmful irradiation!

Victory-corner:

Italian verdict against mobile- and DECT phones!

org. The regional court in northern Italy has confirmed the correlation by a final legally valid sentence: The brain tumor of a company employee was caused by him having to use his business mobile- and DECT telephones extensively. The verdict is particularly groundbreaking because the judges rejected the industry-funded expert opinions as non-trustworthy. They only relied on independent opinions.

The plaintiff was awarded an 80% disability pension because of his "mobile phone damage". On top of that the employer INAIL (a public underwriter of compulsory insurance) had to pay the court costs of all instances. The verdict enables employees in Italy to demand wired phones in their offices and to inform the employer that they are fully liable for follow up damages if they demand the use of mobile phones.
